Canadian Medication Incident Reporting and Prevention System

Système canadien de déclaration et de prévention des incidents médicamenteux

Supporting a safe healthcare system is a shared responsibility

CMIRPS uses a collaborative approach to collect and analyze medication incident reports and to share information and expertise. Through the generation of knowledge designed to reduce the occurrence of harmful medication incidents, this model is contributing to a safer medication use system in Canada.

How CMIRPS prevents and responds to medication incidents across Canada:

The Canadian Medication Incident Reporting and Prevention System (CMIRPS) is a collaborative program designed to reduce the occurrence of harmful medication incidents in Canada.

CMIRPS

generates
knowledge on
medication
incidents, incident
types, trends,
root causes and
preventative
measures.
